# ONGOING PROJECTS

## ADOPT A SCHOOL

Quality education is a fundamental right, but many of our schools in rural areas lack basic infrastructure and modern educational facilities.

### Our aim by end of 2025:

- To cover 100 schools with minimum 50 or more students
- To provide basic modern educational tools like Smart Classes, Computers, etc.
- To train the teachers with modern teaching techniques and methodologies

## ENABLING YOUTH TO WORK

"Give a man a fish and you feed him for a day; teach a man to fish and you feed him for a life time!"

Unemployment breeds many social evils. Unfortunately our current education system has not been able to cater the need of changing job environment. Also, the unemployed youth lack entrepreneurship skills and uses of local resources.

Our foundation aims to help 2000 youth stand on their feet by 2025. This would be achieved by following activities:

- By creating marketplace for local artisans using various digital platforms
- By making youth employable through skilling and reskilling to match the changing job requirements
- By installing entrepreneurial mindset among youth via various workshops and handholding activities

## DHAROHAR

Children who are emotionally attached to their roots generally develop as better human beings and socially responsible citizens. People who migrated and settled in Metros always feel that their kids are not aware about the tradition and culture of their home state and miss the connection.

Our MITTI Foundation is committed to revive and install traditional values among young generation through our initiative DHAROHAR. It is a unique way where migrant intellectuals unite under one umbrella to learn and teach about traditional values and culture.

Our initiative is focused on workshops by experts

- To make our kids aware about the folk culture of their respective states
- To celebrate traditional festivals
- To learn our traditional food and delicacies
